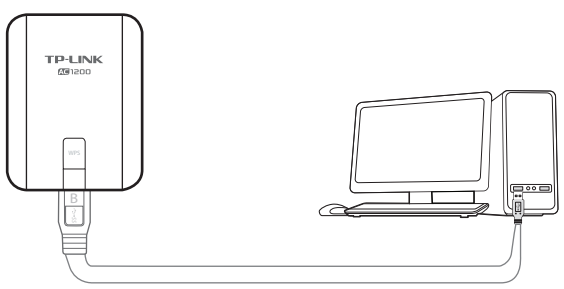
1 Connect to a Computer

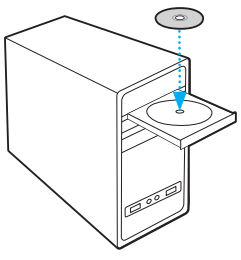
Insert the adapter into a USB port on your computer via the USB cable provided.



Note: In Windows XP, a Found New Hardware Wizard window will pop up after the adapter has been inserted. Please click Cancel.

2 Install the Software

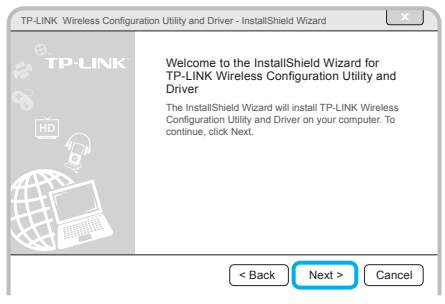
* You can also download the driver and Utility at **www.tp-link.com/en/** if your computer can access the Internet via a wired connection.



Note:
If the Resource CD screen does not display, browse the files on the CD and double-click Autorun.exe.

Insert the TP-LINK resource CD into the CD-ROM drive. The **Resource CD** screen will pop up automatically.

Select the model Archer T4UH and click **Install Driver&Utility.**



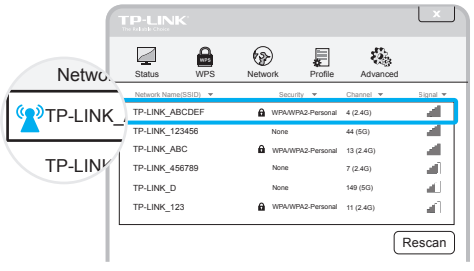
TP-LINK Wireless Configuration Utility and Driver - InstallShield Wizard
TP-LINK
Welcome to the InstallShield Wizard for TP-LINK Wireless Configuration Utility and Driver
The InstallShield Wizard will install TP-LINK Wireless Configuration Utility and Driver on your computer. To continue, click Next.
< Back
Next >
Cancel

The **InstallShield Wizard** window will appear, Click **Next** and follow the instructions to finish the installation process.

3 Join a Wireless Network

You can join a wireless network from this TWCU (TP-LINK Wireless Configuration Utility) screen, or you can use WPS (Wi-Fi Protected Setup) if your wireless network supports it.

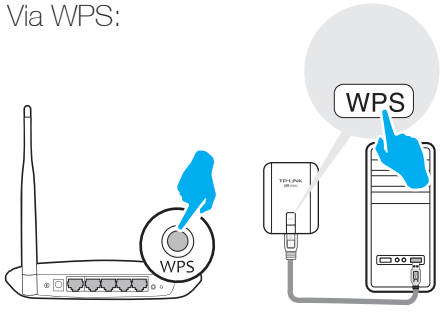
Via TWCU:



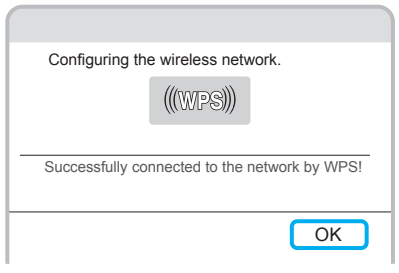
Select your target wireless network from the list and click **Connect**. If the network is secure, enter its password.The symbol indicates a successful connection.

or

Via WPS:



Press the WPS button on your wireless router or gateway. Within 2 minutes, press and hold the WPS button on the adapter for 3 seconds.



The connection process takes a few minutes and you will see the above screen when it is successful.
